## ORGANIC FRUIT & VEGETABLE PRODUCTS

# ORGANIC JUICES (NFC)

All our **fruit and vegetable juices** are certified organic, 100% pure, not from concentrate (NFC), highly nutritional and fit for use in the beverage industry.

As well as 100% pure juice, we also offer lacto-fermented and acidified vegetable juice. Lacto-fermentation is a simple preservation process that works by adding bacteria to the juice. Acidification means that we add lemon juice or concentrate. The choice is yours!

Our **organic fruit and vegetable juices** are often used in the beverage industry (fruit juice, lemonades, cocktails, kombucha, beer,...), or as an ingredient in sorbets, ice cream and baby food (with additional analysis).

# ORGANIC PUREES

We offer a range of organic **fruit and vegetable purees** in drums or cartons, all certified organic.

Most fruit and vegetables are pasteurized and aseptically packaged. However, this heat treatment can make the colour darker. For this reason we have a range of cold-processed purees in 18kg cartons. By processing cold you have a great colour retention & maximum taste. This range is especially appreciated by the ice cream processors among our customers.

Purees are great for applications such as baby food, sorbet, ice cream, juices, desserts, smoothies...

**Fruit concentrate** gives taste to dairy products or serves as the basis for fruit juice, especially to make long-distance transport less costly. Concentrate can also be your healthy alternative to sugar or artificial sweeteners, or a natural way to colour your product.

**Vegetable concentrate** comes lacto-fermented or acidified with lemon juice or concentrate.

We make **blends** according to your recipe or we think along and develop a tailor-made mix that's just right for you.

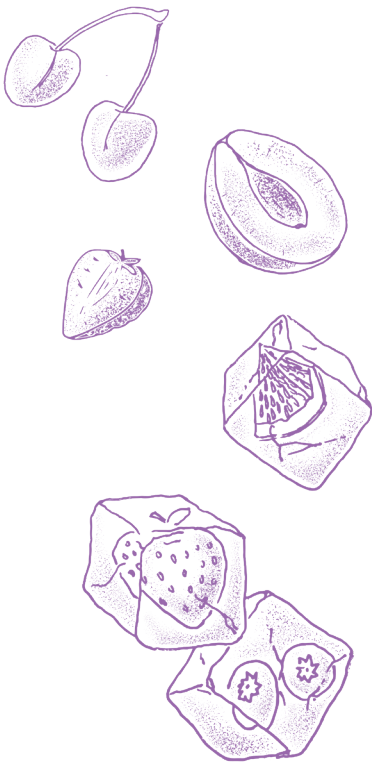

# ORGANIC IQF

To guarantee freshness, our fruit and vegetables are frozen as fast as possible. The **IQF technique (Individually Quick Frozen)** allows for small ice crystals to take shape, which keeps the fruit's cell structure intact and just tastes better.

## WE TAKE “AT YOUR SERVICE” SERIOUSLY

### WHY WE ARE DIFFERENT

#### ✓ 100% organic

We keep a close eye on organic crops worldwide to offer a reliable, wide range of fruits and vegetables. And yes, we believe that organic agriculture makes the world a more healthy place.

#### ✓ Experience & trust

We're a small company and we like it that way. In our team, every member has long-standing experience and a trusted network of contacts.

#### ✓ Flexible packaging

We serve companies with organic ingredients, no matter the size of the company. This means packaging that corresponds to your needs, from 25kg cans to 25000L tank trucks.

### THE WAY WE WORK

#### ✓ Crops

We continuously stay in touch with our suppliers, from Peru to India, to produce the finest organic product.

#### ✓ Analyses

We make sure you'll get the right certificate for the product and provide extra analysis where needed (like baby food).

#### ✓ Storage and transport

Because our storage is centralised, customers can order according to their needs. Don't worry about pre-financing. We guarantee a smooth and fast delivery.

#### ✓ New product development

By following trends, we can offer solutions that you maybe did not even know about.

Nature Favours is the 1st company in Belgium that has been certified for the import of the Fairtrade ginger juice.

If you are looking for other Fairtrade ingredients, please reach out to us and we will be happy to help you.
